

Wallet Account Management

Winnie Yuen - 2024-02-02 - Asset Account Management

Before you can deposit any digital funds, you need to set up your wallets. Once the wallets are set and approved by First Digital, you will be able to use them for issuing instructions for deposit and withdrawals.

1. Go to My Profile and click on **Account Management**.

1. You will see an overview of all your wallets and to add a new wallet, click on **Add Account**.

1. A pop up window will appear and select the service entity, cryptocurrency and enter an alias if needed before clicking on **Next**.

1. It can take a few seconds to create the wallet and once at the confirmation step, click on **Confirm**.

1. After you added the wallet successfully, you will see it in the overview and you can always go to **Action** to view wallet details.
